---

**Résumé** - Aspiring multimedia-designer with passion for content creation and technology. I value optimizing everything I do, whether it's related to enhancing user experience, or help branding a product. It is important to me to contribute with everything I have in my arsenal to fulfill both client's and user's needs.

## Education

---

2022 - present

### Multimedia-design - EASV (Esbjerg)

The program has provided me with the necessary skills for content creation, development, and UX using industry-standard software such as Adobe products and coding languages including HTML, CSS, and JavaScript. The curriculum also emphasized the importance of design thinking to solve user-centered problems.

## Skills & Language

---

- |  |                           |
|--|---------------------------|

| • Design & illustration - Intermediate | • Farsi - Native language |
| • Web development - Intermediate       |                           |

## Personal

---

As a person I'm friendly and I love good teamwork. In my free time I enjoy spending my time cooking various dishes from all around the globe. Getting to know the different types of cuisines has taught me that the beauty in life is all about diversity and progressively creating new opportunities for oneself.
